

Basic First Aid - Online

Suitability: This course is suitable for anyone who would like to learn some basic first aid techniques in handling accidents or illnesses. It provides clear awareness of what has to be done until professional medical assistance takes over. This course is also suitable to renew an existing qualification in the subject

Validity of Certificate: 3 years

Course Duration: 4 hours

Course Assessment:

- You are required to study the modules in their logical order (from module 1 to module 7) and undertake a multiple choice assessment test after each module.
- You are required to obtain a pass mark of 80% out of each module assessment test in order to be able to move on to the next module (You would be given the opportunity to amend wrongly answered questions so to understand the correct answer)
- Once complete at the end you will find a slide with instructions in order to issue your digital or hard copy certificate.

Certification: Upon successfully completing the Basic First Aid course, each participant will be issued with a certificate of competence in the subject

The Basic First Aid course includes practice of Primary Survey concluded by CPR on adult manikin, Secondary Survey concluded by the recovery position, practice of various wound dressing and sling-making

The Basic First Aid course is made up of 4 sections, which are:
